per Queen, Copper Queen No. 8, Halliday, Halli-day No. 3, Morris No. 1, Morris No. 8 and Glance No. 3; fourteen adjoining claims show ing color and outcrop, but not yet developed 21 properties in all, covering 420 acres of mineralized land, with a total length on the United Verde Copper belt of about 3 miles. (See map in new prospectus.)
PRODUCT of these mines is ore averaging fr

assays, milling tests and smelter returns 17% per cent. copper. It is easy of extraction, being mainly of a soft nature, and free smelting. as it is not refractory and carries its own fluxes, thus reducing expense of production to a minimum. (See prospectus for detailed figures, and originals of smelter returns, as says, &c., on file at the company's offices. The ores run as high as 79 and 80 per cent, cop per; the big nugget taken from Copper Queen No. 3, a few weeks since, shows 50 per cent pure copper; shipping returns give actual net rofit of \$21.60 per ton, while all estimates are based on \$12 per ton profit.

MPLES of the ore from three of the mines, to scaled registered package, under affidavit from the Superintendent, were delivered to Dr Pierre de P. Ricketts, Professor of Analytics Chemistry and Assaying of the Columbia Uni versity School of Mines of New York, and, as is well known, one of the greatest authorities on mining in the United States, and head of the firm of Ricketts & Banks, 104 John st., New York, whose report is as follows :

Sample No. 16,755 . . . . . 17.12% copper Sample No. 16,756 . . . . . 21.31% copper Sample No. 16,757 . . . . . 35.44% copper PROSPECTS: It is a practical certainty that hold-

ers of Val Verde shares at par will net 24 per cent. per annum. All estimates as to profits from this company's operations have been based on 12-cent copper, leaving an assured margin of at least 50 per cent at present market figures, sufficient to more than double the net profits, and enable the payment of 48 per cent. dividends, instead of the 24 per cent.

ROPOSITIONS: The seven mines now in operation have been proven good, are improving daily, and developing richer bodies of ore as work progresses, the veins widening and show ing better ore as the shafts deepen. The most recent work has resulted in such satisfactory evidence of the value of the mines that the directors have decided to extend operations into the adjoining claims owned by the company; exploration work will begin at once on seven of these, viz. Madonna, Madonna No. 2 Chicago and Echo, and thorough developmen will be prosecuted with a large additional force of men. As this will undoubtedly increase the

output from the properties, the smalter capacity will also be necessarily enlarged.

THESE PLANS have been presented by the general manager, and the directors, believing them
fully warranted by the results from the operations thus far, have decided to put them into immediate effect, thus enabling the company to get a larger amount of its product into the market, and at an earlier day, and forwarding by several months the payment of dividend to shareholders.

The Val Verde Copper Company, Ltd., i nation of 120,000 shares at \$5.00 per share par value, 70,000 shares being the payment for the properties, and 50,000 reserved to these latter a limited issue is now offered at Par.

## \$5.00 Per Share,

he proceeds being devoted to the purpose above set forth. This figure is not, however guaranteed to any specific number of shares as the property is constantly becoming more valuable, and the directors expressly re serve the right to advance the price 87.50 or more without notice.

the investment world is divided into two classes that is to say, there is a class embracing savings banks, trustees and fiduciary interests in general, which is restricted by severe laws to the purchase of certain securities; the other class is composed of men and women of business experience, who are not afraid to buy securities where they can get the best results for their money.

Broadly summed up, securities are bought for institutions and for individuals. For example:

We have sold to bank officers for their personal investment securities which by law they were unable to buy for their respective banks. Such securities are usually the bonds or shares of substantial manufacturing corporations, located in or near New York city.

ROUTES FOR CYCLE RIDERS.

The Best and Shortest Roads to Boston and

Other Cities.

usual and most direct route is as follows: Cross Central Bridge and go up Jerome avenue to the

Fordham Landing road, on this through Fordham

to Bronz Park to the Boston road and along it to New Rochelle. From there ride through Port Chester, Norwalk, Stamford and Bridgeport. As far

take the old Boston road to the left to North Wol

but riders who are most familiar with the trip recommend instead riding out on the

main street, turning at right angles across the Boston and Albany Railroad track and going up hill to the North Grafton road. In this way you get fourteen miles down grade and through magnificent scenery. The rest of the way leads through Westlero to South Framingham, from which place it is twenty miles in straight line to Boston. The distance by this route from C ty Hall, New York, to the Boston City Hall is 2624 miles.
